

## Partner Search Form

**Industrial University of Tyumen (Russia) is looking for partnerships in the frame of Erasmus Plus program (Erasmus+ International Credit Mobility and Capacity Building in the Field of Higher Education).**

Throughout its 60-year History, the IUT has always played an important role in the region's economy. In 2016, the situation has been strengthened when the IUT has acquired the status of "Flagship University" in the frame of the program of Ministry of Education and Science of the Russian Federation. Today, the IUT is a leading technical University in Western Siberia, one of the leaders in Russian engineering education. Its main targets up to 2020 are: improvement of the academic programs and methods, deep integration of scientific researches, education process and practical experience at the region's leading companies.

IUT provides a wide range of opportunities for education. The university implements 34 programs of Bachelor Degree and 21 programs of Master's Degree in the field of petroleum engineering, geology, mechanical engineering, materials science and technology, design and technology support of engineering productions, energy and resource saving processes, automation of technological processes, business Informatics, chemical technology, technosphere safety, transportation processes, architecture and construction, informatics, etc.
